

Village Dormitory Siting Studies

The Village Dorm Expansion of four additional student housing buildings anticipates future college growth. Extending the popular, pedestrian-friendly original, 9-building Village Dorm layout (pictured below) into a forested hillside glade would provide an efficient, low-scale solution for 70 new student beds. The layout is also sensitive to the historical setback requirements of Annandale Road. Each building is set into the landscape to

address both the street side and a private community courtyard designed to preserve the natural beauty of the site. Current needs are being met elsewhere on campus in a separate, future LEED Silver Certified AAP project, Robbins House Addition (New Robbins), so the status of the new Village Dorms is presently on hold.
